  ACLC Mandaluyong – 2013

CAREER OBJECTIVES

Software Developer with 3+ years of experience designing and developing applications, seeking a role that focused on good development practice and professional growth.

EXPERIENCE

SOFTWARE DEVELOPER

Castles Int'l Technology & Services PHL, Inc (Aug 2022 – Present)

- Refactored and maintained multiple modules in legacy C# WinForms + MySQL MIS application; eliminated recurring runtime failures in developed areas and improved module-level reliability for daily operations.
- Designed and implemented Helpdesk and Billing modules, replacing manual and Excel-based processes; reduced processing time and human error.
- Built automated email application for billing statements, reminders, SOA, with (custom timing, CC/BCC, send logs) and operational reports; removed manual sending and improved collection tracking.
- Improved MySQL database reliability: cleaned inconsistent data, introduced stored procedures, triggers, functions, and events to centralize rules and prevent integrity violations.
- Refactored PHP REST API: controller–service–repository separation, standardized response formats, removed tight coupling, improved maintainability.
- Managed Git workflows and AWS deployments to stabilize releases and minimize production issues.

KEY ENTRY OPERATOR

Freight Process Outsourcing Solutions Inc. (2021 – 2022)

- Entered shipment data from faxed documents into the company system, applying complex business rules and validations.
- Consistently met a daily minimum quota of 100 shipments with accuracy.
- Processed and analyzed operational data in Excel, generating reports that supported management decisions.

DATA ENCODER

Promerch Unlimited Inc (2015 – 2016)

- Produced daily Excel reports and charts on merchandisers' inventory, ensuring clients had accurate, up-to-date stock information.
- Created Excel-based calculations, summaries, and charts to track inventory and support planning decisions.
- Provided technical support for hardware, software, and network issues to keep operations running.
- Collaborated with coordinators and merchandisers to resolve stock discrepancies, reducing errors and improving inventory management.
