PROFESSIONAL SUMMARY

C# / .NET Software Developer with nearly four years of professional experience building and maintaining business applications. Primary experience includes C# and .NET WinForms applications backed by MySQL, with additional experience in REST API integrations and ASP.NET Core applications. Experienced in supporting Operations, Administration, Finance, and MIS teams through billing, helpdesk, reporting, document generation, inventory, and business-process automation solutions.

TECHNICAL SKILLS

Languages & Frameworks	C#, .NET, WinForms, ASP.NET Core, Entity Framework Core, LINQ, Async/Await, Dependency Injection
Databases	MySQL, SQL, Stored Procedures, Views, Triggers, Indexing, Query Optimization
APIs & Reporting	REST APIs, REST API Integration, JSON, Swagger, Postman, Crystal Reports, PDF Generation, HTML/CSS, MS Office
Tools & Practices	Git, GitHub, Visual Studio, Visual Studio Code, AWS EC2, Object-Oriented Programming, Debugging, Testing, Requirements Gathering, Technical Documentation

PROFESSIONAL EXPERIENCE

Software Developer | Castles International Technology and Services Philippines, Inc.
Aug 2022 – Apr 2026

- Led the design, development, and maintenance of C#/.NET WinForms applications backed by MySQL for billing, inventory, helpdesk, reporting, and document workflows.
- Modernized manual Excel-based processes by automating repetitive workflows and improving operations for Finance, Operations, Administration, and MIS teams.
- Developed a Finance Billing System supporting more than 17,000 records, reducing billing reconciliation time from approximately one month to one week.
- Built a Helpdesk System that centralized support tracking, resolution monitoring, and KPI reporting, improving visibility into support operations.
- Developed a Report Builder that transformed large transaction files into client-specific reports in seconds using predefined business rules and formats.
- Automated billing notifications and SOA PDF generation by producing HTML emails, attaching Statement of Account documents, and sending scheduled reminders without manual intervention.
- Developed and maintained REST API integrations using JSON-based data exchange; optimized MySQL operations with stored procedures, views, triggers, indexing, and query optimization.
- Investigated production issues and application defects, troubleshot database problems, and translated business requirements into software features and process improvements.

Key Entry Operator | Freight Process Outsourcing Solutions Inc.
Previous Experience (May 2021 – June 2022)

- Processed freight shipment data and supported reporting activities for operational workflows.

Data Encoder | Promerch Unlimited Inc.
Previous Experience (Feb 2015 – Feb 2016)

- Maintained inventory data and supported reporting activities, helping keep operational records organized and accurate.

SELECTED PROJECTS

Finance Billing System: Built a billing workflow solution supporting more than 17,000 records and reduced reconciliation time from approximately one month to one week.

Report Builder: Built a reporting application that transformed large transaction files into client-specific reports in seconds.

Helpdesk System: Developed a centralized support-tracking and KPI-reporting system to improve monitoring of support requests and resolutions.

ASP.NET Core REST API: Developed a personal REST API project demonstrating ASP.NET Core backend development and API integration concepts.

EDUCATION & CREDENTIALS

Bachelor of Science in Information Technology
Jose Rizal University · 2017 - 2023

TESDA - Programming NC IV *(Certification)*
ACLC Mandaluyong · 2012 - 2014

Diploma in Software Development
ACLC Mandaluyong · 2012 - 2014

Awards
Programmer of the Year · Best in Thesis
