ABOUT

Software Developer with 3+ years of experience in full-stack application development using C#, WinForms, and MySQL database design, RESTful APIs, system integration, system analysis, software testing and process automation for business applications.

SKILLS & TECHNOLOGIES

Languages	C#, PHP, SQL, JavaScript, HTML/CSS
Frameworks	.NET (WinForms, ASP.NET)
Architecture & Design	Layered Architecture, RESTful API Design, Controller–Service–Repository Pattern
Database	MySQL, Relational Database Design, Schema Design, Normalization, Denormalization, Indexing & Query Optimization, Stored Procedures, Triggers, Views, Events
Testing & Quality	Software Testing, API Testing, Software Debugging
Analysis & Documentation	System Analysis, Requirements Gathering, Technical Documentation
Cloud & & Version Control	AWS, Git, GitHub
Tools	Visual Studio, VS Code, Postman, Swagger

PROFESSIONAL EXPERIENCE

Software Developer | Castles Int'l Technology & Services PHL, Inc.

Aug 2022 – Apr 2026

- Developed and maintained multiple modules within existing C# WinForms and MySQL MIS application. Improved module reliability and reduced runtime issues in production.
- Designed and built Helpdesk, Report Builder, and Billing modules from scratch, replacing Excel-based manual workflows and reducing processing time and error rates by transitioning operations from weeks-long cycles to near real-time processing.
- Built an automated billing email application in C# and .Net (WinForms) that detects monthly due records and sends scheduled HTML emails via SMTP, with configurable client and report recipients (CC/BCC), delivery timing, system runtime scheduling, and retry handling for failed sends.
- Improved MIS Servicing module processing time by optimizing backend workflows and automate report generation and distribution, reducing manual handling and accelerating billing and email operations.
- Improved MySQL reliability through data cleanup, stored procedures, triggers, functions, and scheduled events.
- Refactored PHP REST API: separated business logic, standardized responses, improved maintainability.
- Managed Git workflows and AWS deployments to improve release stability.

Key Entry Operator | Freight Process Outsourcing Solutions Inc.

2021 – 2022

- Processed shipment data from faxed documents, applying complex business rules and validations.
- Consistently met daily quota of 100+ shipments with high accuracy.
- Generated Excel reports supporting management decisions.

Data Encoder | Promerch Unlimited Inc.

2015 – 2016

- Produced daily Excel stock visual reports and summaries for planning decisions.
- Provided hardware, software, and network support to maintain operations.

EDUCATION & CERTIFICATIONS

BS in Information Technology

Jose Rizal University · 2023

Programming NC IV

ACLC Mandaluyong · 2013

Diploma in Software Development

ACLC Mandaluyong · 2012

Awards: Programmer of the Year, Best in Thesis
