## SUMMARY

Software Developer with nearly 4 years of experience building and maintaining business applications using C#, .NET WinForms, MySQL, and REST APIs. Experienced in replacing manual Excel-based workflows with software solutions, automating billing and document processes, optimizing SQL and database objects, integrating APIs, and resolving production issues. Hands-on experience with Git and AWS EC2 deployments.

## SKILLS & TECHNOLOGIES

| | |
|---|---|
| **Languages** | C#, SQL, PHP, JavaScript, HTML/CSS |
| **Frameworks & Backend** | .NET, WinForms, ASP.NET Core, Entity Framework Core, REST API, JSON |
| **Development** | OOP, Dependency Injection, LINQ, Async/Await, MVC |
| **Database** | MySQL, Database Design, Stored Procedures, Views, Triggers, Scheduled Events, Indexing, Query Optimization |
| **Tools** | Git, Visual Studio, VS Code, Postman, Swagger |
| **Engineering** | Debugging, Testing, Root Cause Analysis, Requirements Gathering, Technical Documentation |
| **Deployment** | AWS EC2 |

## PROFESSIONAL EXPERIENCE

**Software Developer** | Castles International Technology and Services Philippines, Inc.
*Aug 2022 – Apr 2026*

- Developed and maintained C# WinForms applications and MySQL databases used by Operations, Administration, Finance, and MIS teams.
- Developed a Finance Billing System that replaced Excel-based servicing, inventory, and billing workflows involving more than 17,000 terminal and merchant records, reducing billing reconciliation and validation time from approximately one month to one week and providing clients with real-time access to terminal and merchant information.
- Developed a Helpdesk System for tracking support requests, resolutions, and KPI metrics, eliminating up to one week of manual KPI reporting through real-time monitoring.
- Developed a Report Builder application that transformed client CSV exports into required report formats based on predefined templates and business rules.
- Built an automated billing notification application that monitored billing records, generated HTML email notifications, automatically attached Statement of Account (SOA) PDFs, and sent scheduled reminders based on configurable business rules and due dates.
- Built an automated SOA PDF Generator that converted billing data into PDF statements and generated documents on scheduled intervals without manual intervention.
- Developed and optimized MySQL stored procedures, triggers, scheduled events, and SQL queries to support application functionality and performance.
- Developed and maintained REST API integrations between internal applications and external systems.
- Investigated and resolved production issues, application defects, and database-related problems.
- Gathered requirements from business users and translated them into system features and process improvements
- Participated in application deployment and maintenance using Git and AWS EC2.

**Key Entry Operator** | Freight Process Outsourcing Solutions Inc.
*2021 – 2022*

- Processed shipment information according to business rules, maintained high data accuracy, and prepared operational Excel reports.

**Data Encoder** | Promerch Unlimited Inc.
*2015 – 2016*

- Managed inventory data encoding and reporting, developed Excel templates and visualizations for item monitoring, and provided basic computer, software, and network troubleshooting support.

## EDUCATION & CERTIFICATIONS

**BS in Information Technology**
Jose Rizal University · 2023

**Diploma in Software Development**
ACLC Mandaluyong · 2012
*Awards: Programmer of the Year, Best in Thesis*

**Programming NC IV**
ACLC Mandaluyong · 2012
