PROFESSIONAL EXPERIENCE

Software Developer | Castles Int'l Technology & Services PHL, Inc.

Aug 2022 – Apr 2026

- Developed and maintained multiple modules for C# WinForms and MySQL-based MIS applications.
- Designed and implemented Helpdesk, Report Builder and Finance billing modules, replacing Excel-based manual workflows.
- Built an automated billing notification application that monitored billing records, generated HTML email notifications, attached Statement of Account (SOA) PDF documents for 45-day notices, and automatically delivered scheduled reminders based on configurable business rules and due dates.
- Built an automated Statement of Account (SOA) PDF Generator that converted billing data into PDF statements and generated documents on scheduled intervals without manual intervention.
- Maintained and optimized legacy MIS applications by implementing feature enhancements, resolving production issues, and improving application stability.
- Maintained and optimized MySQL databases by developing stored procedures, triggers, scheduled events, and optimized SQL queries to improve application performance and reliability.
- Integrated and maintained REST APIs for communication between internal systems and external services.
- Performed software testing, debugging, root cause analysis, and issue resolution for production incidents.
- Worked with business users during requirements gathering and prepared technical documentation for implemented features.
- Used Git for source control and participated in AWS EC2 application deployments.

Key Entry Operator | Freight Process Outsourcing Solutions Inc.

2021 – 2022

- Processed shipment information according to business rules, maintained high data accuracy, and prepared operational Excel reports.

Data Encoder | Promerch Unlimited Inc.

2015 – 2016

- Managed inventory data encoding and reporting, developed Excel templates and visualizations for item monitoring, and provided basic computer, software, and network troubleshooting support.
